

On **1 April 2020** we will be launching the **VTS Appeals and Listings Service (AALS)**, a simplified and more effective manner for our service users to search and extract information in England for:

- appeals awaiting listing;
- listed appeals; and
- appeal decisions.

This will apply to the 2017 non-domestic rating list (Check, Challenge, Appeals); penalty appeals; council tax liability and council tax valuation and council tax invalidity appeals.

By using meaningful filters, AALS provides our users the ability to access the published decisions that they are searching for in a more effective way. AALS will also provide standard search options to access data we hold for appeal types, such as:

Search types	What information is retrieved?
Registered appeals awaiting listing	Appeal number, address, date registered and billing authority. These can be further filtered by appeal type.
Appeals listed for hearing	Appeal number, address, hearing date, hearing venue and billing authority. These can be further filtered by appeal type.
List of hearings for next 3 months	Hearing date, town/city, hearing venue, providing a link to view the appeals listed to each hearing
Decisions	Appeal number, address, decision date, billing authority. These can be filtered by appeal type and appeal decision outcome.

For non-domestic rating appeals on the 2017 we have also introduced a search facility on:

- the rateable value (RV) of a property;
- the specific list year;
- primary description; and
- the agent/ representative name (if applicable).

All information can be downloaded in a .csv format.

Please note that the existing listings and decisions service will continue to provide information for non-domestic rating appeals on the lists prior to 2017 (decisions and list cases).
